

Silicone

Shaped silicone profiles

We have around 4.000 different extrusion tools, including shapes as diverse as types: T, h, e, P, L, U, OO, autoclave, scraper, etc.

Our compact silicone standard is 65 Shore A in translucent color, although we can manufacture from 20 to 85 Shore A in any basic color and any RAL custom-made from 25 kg, as well as in luminescent, fluorescent, or metallic colors.

Our manufacturing process allow us to supply any kind of shape under technical drawing or sample in different lengths: 25 m, 50 m, 100 m, 250 m and 500 m. It is also possible to make other measurements and cut pieces from 1 mm in length, on request.

All this wide production range allow us to offer the best market service, with a delivery time less than two weeks in all types of bases: standard insulating silicone (MVQ), conductive silicone, vapor resistant silicone, fluorosilicone (FVMQ), very high temperature silicone (THT), very low temperature silicone (PMVQ), platinum cured silicone, food grade silicone in compliance with FDA (CFR21 section 177.2600), BgVV (recommendation XV) and medical grade silicone can comply with USP class VI.
