## Silicone sponge profiles

---

In spongy silicone our standard is broken white with a density of 0.25 gr/cm<sup>3</sup>, although we can manufacture any color from a minimum quantity and with densities of 0.3 gr/ cm<sup>3</sup>, 0.4 gr/ cm<sup>3</sup>, 0.5 gr/ cm<sup>3</sup>, 0.6 gr/ cm<sup>3</sup> and 0.8 gr/ cm<sup>3</sup>.

We manufacture silicone cords from 2 mm up to 75 mm in diameter, rectangular and square profiles from 2 mm x 2 mm to 75 mm x 75 mm and silicone tubes from 2 mm to 100 mm in internal diameter.

Our manufacturing process allows us to supply any type of shape under a technical drawing or sample in lengths of 25 m, 50 m, 100 m, 250 m and 500 m. On request we can also make other sizes and cut pieces from 1 mm in length.

We have formulations for high temperatures (up to +250 °C), and others suitable for contact with food (FDA)
