

Silicone

Silicone tubes

Our compact silicone standard is 65 Shore A in translucent color, although we can make from 20 to 85 Shore A in any basic color and any RAL custom-made from 25 kg, as well as in luminescent, fluorescent, or metallic colors.

We manufacture silicone tubes from 1 mm internal diameter up to an external diameter of 180 mm, with a thickness starting at 0,25 mm, in different roll lengths (10 m, 25 m, 50 m, 100 m, 250 m and 500 m). On request, we can also make other sizes and cut pieces from 1 mm long.

All this wide production range allow us to offer the best market service, with a delivery time less than two weeks in all types of bases: standard insulating silicone (MVQ), conductive silicone, vapor resistant silicone, fluorosilicone (FVMQ), very high temperature silicone (THT), very low temperature silicone (PMVQ), platinum cured silicone, food grade silicone in compliance with FDA (CFR21 section 177.2600), BgVV (recommendation XV) and medical grade silicone can comply with USP class VI.
